

# **Description**

The SPCL15 series of high power TVS diode is specially designed for meeting severe surge test environment of both AC and DC line protection applications. It features a very fast response and ultra low clamping characteristics over traditional metal oxide varistor ( MOV ) solutions. They can be connected in series and / or parallel to create a very high surge current protection solution.

# **Applications**

- Communication Equipment
- Security & Protection
- Industrial Control Equipment
- **Power Supply**
- **Automotive Electronics**
- **New Energy**
- Lightning Protection

#### **Features**

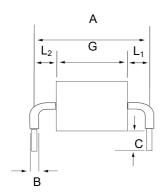

- Very low clamping voltage
- Sharp breakdown voltage
- Low slope resistance
- Bi-directional
- Snapback technology for superior clamping factor
- Symmetric in leads width for easier soldering during
- IEC-61000-4-2 ESD 30 kV (Air), 30 kV (Contact)
- ESD protection of data lines in accordance with IEC 61000-4-2
- EFT protection of data lines in accordance with IEC 61000-4-4
- Surge protection of lightning in accordance with IEC61000-4-5
- Halogen-free
- RoHS compliant
- Glass passivated junction
- Pb-free E4 means 2<sup>nd</sup> level interconnect is Pb-free and the terminal finish material is Silver

# **Glossary**

| Item                    | Description  |
|-------------------------|--|
| V <sub>C</sub>          | Clamping Voltage  Voltage across TVS in a region of low differential resistance that serves to limit the voltage across the device terminals.  |
| V <sub>R</sub>          | Reverse Stand-off Voltage Maximum voltage that can be applied to the TVS without operation. NOTE: It is also shown as $V_{\text{WM}}$ (maximum working voltage (maximum d.c. voltage)) and known as rated stand-off voltage ( $V_{\text{so}}$ ). |
| I <sub>R</sub>          | Reverse Leakage Current  Current measured at $V_{R.}$ NOTE: Also shown as $I_D$ for stand-by current.  |
| <b>V</b> <sub>BR</sub>  | Breakdown Voltage Voltage across TVS at a specified current $I_T$ in the breakdown region.   |
| <b>I</b> <sub>PPM</sub> | Rated Random Recurring Peak Impulse Current  Maximum-rated value of random recurring peak impulse current that may be applied to a device.   |
| P <sub>M(AV)</sub>      | Rated Average Power Dissipation  Maximum-rated value of power dissipation resulting from all sources, including transients and standby current, averaged over a short period of time.  |
| P <sub>PPM</sub>        | Rated Random Recurring Peak Impulse Power Dissipation  Maximum-rated value of the product of rated random recurring peak impulse current ( $I_{PPM}$ ) multiplies by specified maximum clamping voltage ( $V_{C}$ ).                             |
| C <sub>J</sub>          | Capacitance Capacitance across the TVS measured at a specified frequency and voltage.  |
| <b>V</b> <sub>FS</sub>  | Peak Forward Surge Voltage  Peak voltage across an TVS for a specified forward surge current ( $I_{FS}$ ) and time duration.  NOTE: Also shown as $V_{F}$ .  |
| I <sub>FS</sub>         | Forward Surge Current  Pulsed current through TVS in the forward conducting region.  NOTE: Also shown as $I_{\rm F}$ .   |
| α <sub>V(BR)</sub>      | Temperature Coefficient of Breakdown Voltage  The change of breakdown voltage divided by the change of temperature.  |
| I <sub>PP</sub>         | Peak pulse Current Peak pulse current value applied across the TVS to determine the clamping voltage $V_{\mathbb{C}}$ for a specified wave shape.  |
| <b>I</b> T              | Pulsed D.C. Test Current Test current for measurement of the breakdown voltage $V_{BR}$ . This is defined by the manufacturer and usually given in milliamperes with a pulse duration of less than 40 ms.  NOTE: Also shown as $I_{BR}$ .        |

-(GB-T 18802.321 / IEC 61643-321 / JESD210A)

# **Usage**

- TVS must be operated in the specified ambient temp.
- 2. Do not clean the TVS with strong polar solvent such as ketone, esters, benzene and halogenated hydrocarbon, to avoid damaging the encapsulating layer.
- 3. Please do not apply severe vibration, shock or pressure to TVS, to avoid element cracking.

## Replacement

- 1. If TVS is visually damaged, please replace it.
- 2. TVS is a non-repairable product. For safety sake, please use equivalent TVS for replacement.

# **Storage**

- 1. Storage Temp. Range: (-55 to 150) °C.
- 2. Do not store the TVS at the high temp., high humidity or corrosive gas environment, to avoid influencing the solder- ability of the lead wires. The product shall be used up within 1 year after receiving the goods.

#### **Environmental Conditions**

- 1. TVS should not be exposed to the open air, nor direct sunshine.
- 2. TVS should avoid rain, water vapor or other condition of high temp. and high humidity.
- 3. TVS should avoid sand dust, salt mist, or other harmful gases.

# Max. Typical Capacitance of TVS

The typical capacitance of TVS is listed in the specifications. Designers may refer to it when designing TVS in High frequency circuit.

#### **Installation Mechanical Stress**

- 1. Do not knock TVS when installing, to avoid mechanical damage.
- 2. Please do not apply severe vibration, shock or pressure to TVS, to avoid surface resin or element cracking.
